## Safer Patient Handling

### Who is this training for?

Anybody who is involved in the care of another person, be it those who care for people in the community, care or nursing homes, hospices or hospitals it is important that all staff are able to handle patients/clients in their care with dignity and reduce the risk of injury to themselves and the people they care for.

### What does the course cover?

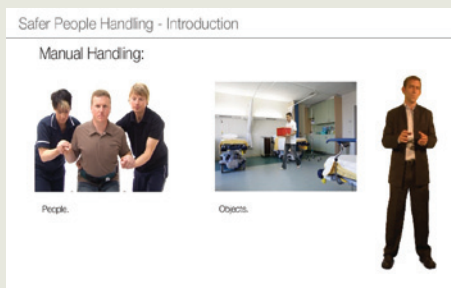

- A background to the problem in healthcare organisations and bad practices
- MHOR and the Human Rights Act
- Controversial Handling Techniques
- Good Practice and Best Practice
- The principles of Manual Handling as applied specifically to the healthcare environment and People Handling.
- Risk Assessments

### Training Outcomes

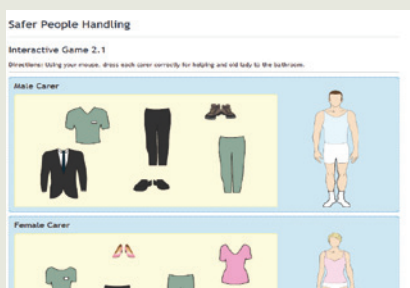

- Understanding of the Manual Handling Operations Regulations
- Understand key legislation relating to moving and handling of people.
- The principles of moving and handling
- Know how to move and position people safely

### Test and Certifications:

- At the end of the course you will be given a test of 20 multiple choice questions. The required pass rate is 85%.
- You will be able to download and print (if required) a digital certificate on completion of the course.
- Main course certificates last 3 years. (Refresher courses are available and recommended every 12 months).

Video Presentations.

Interactive games.

Test and Certification.

“More than a third of all over-three-day injuries reported each year are caused by manual handling - the transporting or supporting of loads by hand or by bodily force. Effective training has an important part to play in reducing the risk of manual handling injury.”

HSE Executive
